

Bio-based polymers for advanced Personal Care solutions

Formulation tips

An **accurate dispersion** is important not only to ensure the correct inclusion of guar into formulations, but also to deliver better performances of the finished product. Esaflor® guar derivatives are **easy to formulate**. They only need to be added into water under vigorous stirring at room temperature to be dispersed, avoiding lumps' formation. By adjusting **pH to 5.0-5.5** a rapid and full hydration of the polymer is obtained (20' stirring time is recommended). Moderate heating could reduce the hydration time. Esaflor® Zero-X, Esaflor® EC 4 and Esaflor® 4W are **self-hydrating** and don't require any pH adjustment.

Recommended order of addition: water, cationic guar, pH adjuster, amphoteric surfactants, non ionic surfactants, anionic surfactants, other ingredients, salt, preservative, final pH adjuster.

Typical use level: 0.1 – 1.0 %

Non-ionic derivatives

Product	Properties			Performance		Application						Key features
	Degree of modification	Molecular weight	Dissolution	Suspending	Thickening	Shampoo	Conditioner	Body cleanser	Hydro-alcoholic sanitiser	Deodorant	Skin & Sun emulsion	
INCI name: Hydroxypropyl Guar												
Esaflor® 4W	Low	High	Self-hydrating		○○○	●●	●	●●●	●	●	●	Excellent thickening, especially in surfactant solutions. Good compatibility with electrolytes. Smooth skin feel.
Esaflor® HDR	High	High	Dispersible		○○○	●	●	●	●●●	●●	●	Thickener with optimal compatibility with polar solvents and ethanol. Ideal for hand sanitisers with a soft skin feel.
INCI name: C18-C22 Hydroxyalkyl Hydroxypropyl Guar												
Esaflor® HM 22	Medium	High	Dispersible	○○	○○○	●●	●●●	●●		●●●	●●●	Emulsification-aid for O/W emulsions, with excellent thickening and stabilising properties. Good compatibility with electrolytes. Smooth skin feel.

Cationic derivatives

Product	Properties			Performance			Application					Key features
	Degree of modification	Molecular weight	Dissolution	Conditioning	Thickening	Delivery of water-insoluble ingredients	Shampoo	Conditioner	Body cleanser	Deodorant	Skin & Sun emulsion	
INCI name: Guar Hydroxypropyltrimonium Chloride												
Esaflor® Zero-X 	Medium	High	Self-hydrating	○○	○○	○○	●●●	●	●●	●	●●	Optimal conditioning and deposition of water-insoluble actives. Suitable for everyday-use shampoos.
Esaflor® Zero-XB 	Medium	High	Dispersible	○○	○○	○○	●●●	●	●●	●	●●	Optimal conditioning and deposition of water-insoluble actives. Suitable for everyday-use shampoos.
Esaflor® LIGHT 	Medium	Low	Dispersible	○	○	○	●●●	●	●●●	●	●	Light conditioning, ideal for volumising and conditioning shampoos. Suitable for baby shampoos or thin hair.
Esaflor® PLUS 	High	High	Dispersible	○○○	○○○	○○○	●●●	●●●	●●	●	●	Highest conditioning and deposition of water-insoluble actives. Suitable for thick, ethnic or damaged hair.
Esaflor® PURE 	Medium	High	Self-hydrating	○○	○○	○○	●●●	●	●●	●	●	Developed for clear formulations. Moderate conditioning. Ideal for everyday-use shampoos.
Esaflor® EC 3	Medium	High	Dispersible	○○	○○	○○	●●●	●	●●	●	●●	Optimal conditioning and deposition of water-insoluble actives. Suitable for everyday-use shampoos.
Esaflor® EC 4	Medium	High	Self-hydrating	○○	○○	○○	●●●	●	●●	●	●●	Self-hydrating version of Esaflor® EC 3.
Esaflor® EC 5	Medium	Low	Dispersible	○	○	○	●●●	●	●●●	●	●	Light conditioning, ideal for volumising and conditioning shampoos. Suitable for baby shampoos or thin hair.
INCI name: Hydroxypropyl Guar Hydroxypropyltrimonium Chloride												
Esaflor® PFT 	Medium	High	Dispersible	○	○	○	●●●	●	●●●		●	Developed for clear formulations. Light conditioning, ideal for volumising and conditioning shampoos. Improved hair brightness and mildness towards skin.
Esaflor® HC 56	Medium	Medium	Dispersible	○	○	○	●●●	●	●●●		●	Opaque version of Esaflor® PFT.
